🌐 piyushamukherjee

A Web Developer with expertise in Backend and Frontend technologies. Committed to delivering exceptional server-side results and making a substantial impact in dynamic, creative and open source projects.

Experience

● Bharat Intern Web Developer

JAN - FEB 2024

Throughout my internship, I concentrated on honing my front-end abilities by building a **weather app** with real-time data and a responsive **Netflix clone**. My ability to duplicate designs and create interactive applications was demonstrated by these projects, which also highlighted my proficiency with HTML, CSS, and JavaScript. My grasp of frontend programming has been cemented by these experiences, and I can't wait to put these abilities to use in upcoming web development projects to make valuable contributions.

● My Project and Learning Experience

- **C++ file compressor system**

A text file compression tool that enjoys the benefit given by huffman encoding algorithm, i.e, Lossless compression.

- **E-commerce website**

Demonstrated proficiency in frontend technologies by creating an E-commerce website with HTML, CSS.

- **OpenWeather API**

Utilizing the OpenWeather API, this website provides current conditions, including temperature, humidity, and wind speed.

Actively engaged in college hackathons, refining problem-solving abilities and fostering effective teamwork.

Education

● ODM Public School , Bhubaneswar

2020-2022

(10+2)

● SRM University Andhra Pradesh

2022-2026
